**Impact of Religion/Spirituality
on End of Life Decision
Making: Tools for Caregivers**

This session will focus on the impact of religion/spirituality on decision making at end of life. Multiple decisions are required as people age: medicines to take or reject, where to live, who to engage as caregivers or whether to undergo an operation or chemotherapy. There are been a substantial amount of research on how people incorporate belief systems when complex life changing decisions are required, and this presentation will examine how religion/spirituality can influence the decision-making process. In addition, Dr. Dormois will share a variety of easy to use tools that will allow a professional caregiver to have a conversation about spirituality.
